# \$8,000 BURSARIES FOR ENGINEERING STUDENTS

**At least 50 Power Engineering Bursaries will be awarded in 2010!**

The Australian Power Institute is working to enhance the education and professional development of power engineers across Australia. Right now, members of API are seeking high quality electrical and mechanical/mechatronics engineering students with an interest in power engineering to drive the industry's growth in Australia and meet the climate change challenges of the future.

API is offering Power Engineering Bursaries to first year students with an interest in areas of engineering relevant to the power industry. In exceptional circumstances, bursaries may also be awarded to students who are in the second year of their program.

The bursaries have a cash value of \$8,000 over four years. However they also provide paid vocational employment with member companies, with a potential total value exceeding \$20,000 over three summer vacations.

**For more information and the online application go to [www.api.edu.au](http://www.api.edu.au) on the 'Student Info' - Australian Power Industry Bursary link. Closing date 23rd May 2010.**
