The Australian Power Institute

\$8,000 BURSARIES FOR ENGINEERING STUDENTS

>>>> a career with a power of difference >>>>

The Australian Power Institute is working to enhance the education and professional development of power engineers across Australia. Right now, members of API are seeking high quality electrical and mechanical engineering students with an interest in power engineering to drive the industry's growth in Australia and meet the climate change challenges of the future.

API is offering Power Engineering Bursaries to first year students with an interest in areas of engineering relevant to the power industry. In exceptional circumstances, bursaries may also be awarded to students who are in the second year of their program.

The bursaries have a cash value of \$8,000 over four years. However they also provide paid vocational employment with member companies, with a potential total value exceeding \$20,000 over three summer vacations.

At least **50 Power Engineering Bursaries** will be awarded
in **2009!** Closing date: 24th May 2009

For more information and the online application go to www.api.edu.au
on the 'Student Info' - Australian Power Industry Bursary link
