

2020 ENERGY INDUSTRY BURSARIES

\$4000 cash, plus paid vacation employment. Get paid to apply your university studies. Up to 25 Bursaries available in 2020!

As The Australian Power Institute (API) is constantly working to support the education and professional development of engineers & technologists in the energy industry across Australia, API is offering Bursaries to engineering & technology students with an interest in areas of engineering relevant to the electric power industry. The majority of bursaries will be awarded to 1st year students with a proportion available to 2nd and 3rd years.

API is seeking high quality **electrical, mechanical, mechatronics, data, science, and renewable energy related engineering students with an interest in power engineering.** The scale of investment and technological change required in the Australian energy sector is significant and **real & diverse engineering & technology talent is needed to meet the customer expectations for price, reliability and service of electricity for the future.**

The bursaries provide a cash value of \$4,000 over 4 years plus the opportunity where available of paid employment with member companies during the summer vacations. This may require travel and/or relocation away from home to undertake this paid vacation employment.

"The decision to join the API Bursary Program was the best decision I made. API created invaluable networking experiences and provided assistance with securing vacation work which developed my career beyond theoretical/university expertise"
- API Bursary Holder

For further information, visit the API Website or submit your application today!

APPLICATION CLOSE DATE HAS BEEN EXTENDED TO 7 JUNE 2020!
